DETAILED ACTION***Allowable Subject Matter***

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's second argument presented on pages 3 and 4 of the papers filed March 27, 2006 is persuasive. The combination of Frank and Van As would not result in a properly functioning system. Upon initial inspection Examiner found that both Frank and Van As merely call for dynamic allocation of resources. Frank discloses the objective of efficient use of resources in a combined circuit and packet network in column 3 lines 28-32. Van As discloses a similar objective in column 5 lines 54-61. Van As goes on to state in column 8 lines 53-55 that circuit traffic can preempt packet traffic, but cannot be preempted. Upon further review of Frank Examiner found that Frank discloses not just a broad objective of dynamic scheduling but specifically states in column 3 lines 53-56 that it is an objective of the invention "to provide a method of scheduling both circuits and packet which is capable of prioritizing and **preempting both the circuit and the packet traffic** (emphasis added)." Both Frank and Van As disclose dynamic scheduling, however the fact that Van As specifically states circuit traffic cannot be preempted directly violates the stated objective of Frank. The combination of Frank and Van As would render Frank inoperative in respect to an aspect of the invention and is impermissible. Frank teaches dynamically allocating slots within a time frame to circuit or packet traffic in figure 4. Different slots within the same frame are not different resources, however, and therefore Frank does not teach such a limitation. Likewise, the prior art as a whole fails to teach or render obvious the

limitation of allocating different sets of resources to packet and circuit traffic within a combined packet and circuit network. Therefore the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kerri M. Dyke whose telephone number is (571) 272-0542. The examiner can normally be reached on Monday through Friday, 7:00 am - 3:30 pm.
